

International Thematic School

"Microbial Soil Ecology and Ecosystem Services"

OBJECTIFS

- Transfer of knowledge and know-how to young scientists
- Capacity building in Sub-Saharan African countries
- Application of scientific principles for problem solving in Sub-Saharan Africa
- Scientific exchanges and interactions between stakeholders
- Tropical ecology networking and structuring of research in Sub-Saharan Africa.

ACTIONS

Lectures and conferences ; Field visits and meetings with farmers ; Group discussions ; Laboratory demonstrations ; Tropical microbial ecology research mini-projects ; Pre-proposal writing and grant panel workshop

RESULTATS

Capacity building for young scientists in soil microbial ecology, in particular for 10 African participants ; Completion of 6 research mini-projects ; networking between young African, US and French scientists ; participant satisfaction survey

PERSPECTIVES

Renew this kind of intensive course which allows formal training in the latest developments in ecological science, advanced technique application in a stimulating research environment and transnational networking.
