

Comparison of three Arecacea genomes: oil palm (*Elaeis guineensis*), date palm (*Phoenix dactylifera*) and coconut tree (*Cocos nucifera*); co-evolution of sorghum and striga, association study in sorghum and pearl millet

PERSPECTIVES

Comparison of three Arecacea genomes : we are currently annotating all the sequences then the comparison will be performed between the tree Arecacea species and with rice.

A publication on these results will be written jointly by the two research teams
