

Population genetics and architectural-functional models of plant growth. Application to the preservation of genetic resources of *Mascarocoffea*, coffee trees native to Madagascar (MaGenA)

PERSPECTIVES

The results of the round table were posted on the site of the « Global Donor Platform for Rural Development », were sent out through the AARINENA network and will be published as a book chapter within a book on ISDA which will be published by Quae-Wageningen Publishers and CTA in French and English.

We also hope that these reflexions will be carried on within the ArimNet, the Aarinena network, or at a next edition of the ISDA symposium.
